Theme

Travel ,Tourism and Culture

A solution/idea that can boost the current situation of tourism industries including hotels, travel and each other or showcase the rich cultural heritage and traditions of India.

PROBLEM STATEMENT

The problem that planIt aims to solve is the lack of a comprehensive, user-friendly platform for tourists to discover and book local tourism experiences at affordable rates while supporting local heritage and businesses. Many tourists struggle to find authentic and affordable travel experiences, and often resort to using large, impersonal online travel agencies.

Our Solution

We have come with a webapp called PlanIt. PlanIt aims to address this issue by providing a platform that connects tourists with local businesses, offers customizable subscriptions, a virtual assistant guide, reviews and ratings system, and a virtual tours and 360-degree images feature. With planIt, tourists can easily discover and book unique, authentic travel experiences that align with their interests and budget, while supporting local communities.

Future Scope

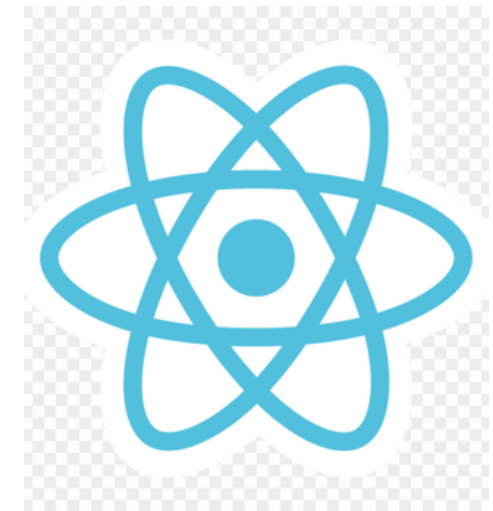

Virtual assistant
guide

Reviews and ratings
system in order to
get authentication
from the people
who have tried our
services

Virtual tours and
360-degree images:
to support local
heritage of that
place and buy local
goods
